

Task

Invoice Processor app.
a simple rails app to process invoices.

1. Create invoices
2. Attach them to Hotel Bookings
3. Add Line items to the invoice

Figma Design

See attached.

Models

- Booking
- Invoice
- LineItem

Features

- Upload a pdf file
- Find a Hotel Booking by ID (entered manually)
- Attach the Invoice to the Hotel Booking
- Add Line items to the invoice
- Remove Line items from the invoice
- Save the invoice with Line items

Requirements

- Rails
- SASS
- Bootstrap
- Hotwire for the FE

Implementation

- SPA Characteristics The application should have a smooth, single-page experience using Hotwire Turbo Frames and Streams. Navigation and form submissions should not trigger full-page reloads.

Nice to Have

- Add forms validations
- Add the navigation steps to the top of the page
- Style the footer with a fixed position at the bottom of the page
